

# UPLIFT NURSING

## AT HOME CONCIERGE CARE

We cover all aspects of your care, whether it's following post-op procedures, acute or chronic illness, palliative or hospice care. We provide daily visits as well as long-term and short-term care in the comfort of your own home.

Recover at home with our team of nurses. Recovering from plastic surgery, joint replacement or major surgery can be stressful. We can ease the strain, by assisting you with resuming your life with dignity and privacy.

We will work with you and your physician to develop a personalized plan that addresses your needs. Whether it is providing 24 hour nursing care in your home, administering medications, or wellness checks for your elderly loved one.
